

INVESTMENT CAST 316 S.S. SAMPLING VALVE

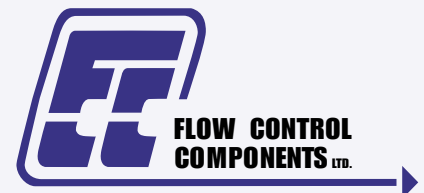

FIG. NO. 51B (CF8M) RESILIENT SEAT - LEVER OPERATED

Design Features

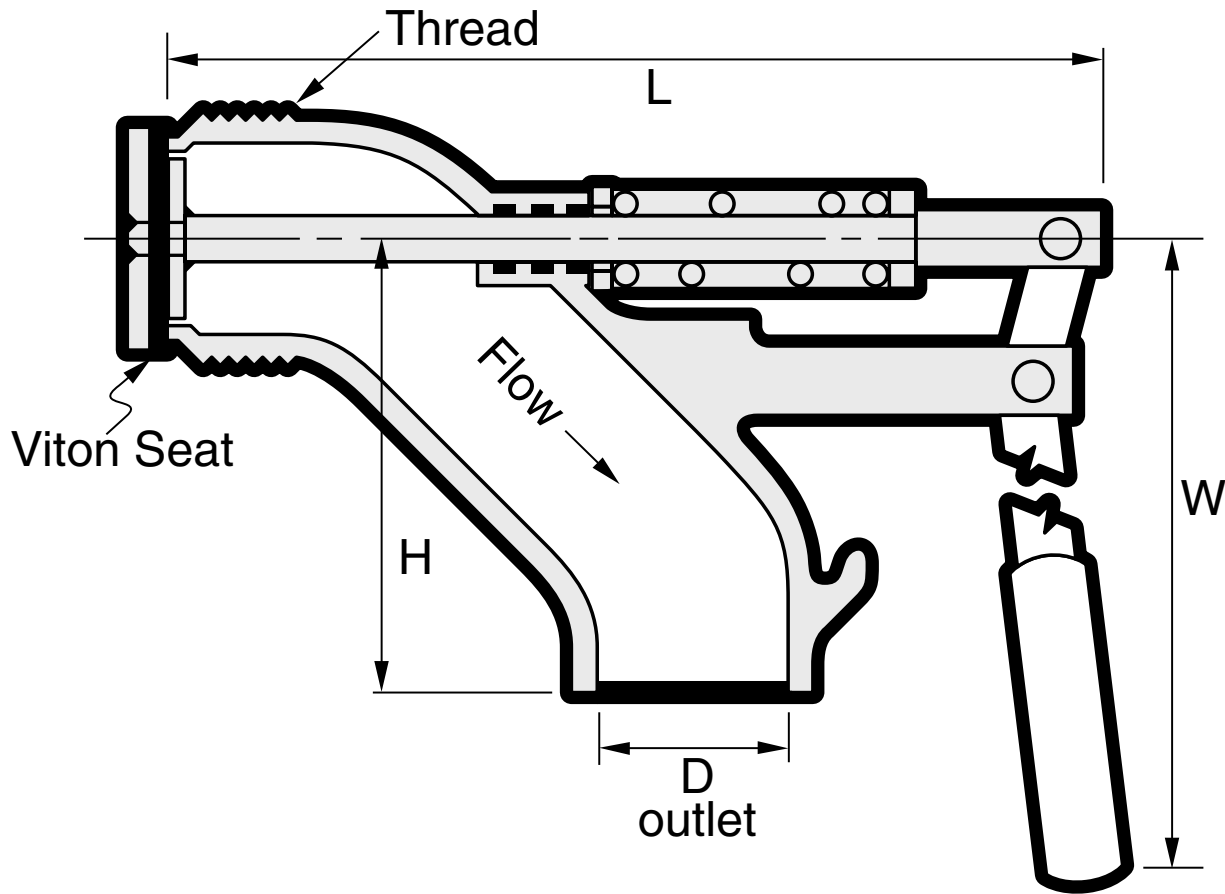

- Cast in corrosion resistant stainless steel.
- 2" NPT X 1 1/2" outlet
- Designed with all wetted parts of 316SS (CF8M) and a viton resilient seat for positive shut-off.
- Lever operated
- Designed for installation in pipe lines or tanks where an occasional sample is required.
- 150 PSI Maximum working pressure.

*Designed to handle corrosive fluids
in the process industries.*
